

LMF SDK v1.9.1.11 - What's new?

Contents

Prerequisites and Compatibility	2
General Improvements.....	3

Prerequisites and Compatibility

LMF 1.9.1 supports the following AT systems and respective system software versions

- Leica Absolute Tracker AT500 v1.0
- Leica Absolute Tracker ATS600 v1.1
- Leica Absolute Tracker AT9x0 v2.2
- Leica Absolute Tracker AT40x v2.4
- Leica Absolute Tracker AT901 v3.8
 - Please note that LMF 1.9 will be the last version to be compatible with the AT901

Most of the new features in LMF 1.9 are due to the introduction of the new Absolute Tracker AT500 and the new B-Probe plus.

LMF 1.9.1 has the following system requirements:

- Windows 10 or higher
- .Net Framework 4.5
- Visual Studio Redist 2019

General Improvements

A connection failure has been fixed when trying to connect to a laser tracker device (AT9x0, ATS600, AT500) which has a laser wake-up time defined using a computer with negative local time (UTC -x, e.g. in US, Mexico, Brazil).

The Wake-up time was reported wrong by 1 hour when connecting to a device which had a wakeup time set. This only affected the displayed time, the device woke-up correctly at the specified time.

More details about LMF 1.9 can be found on *LMF SDK 1.9.0.2538 – WhatsNew*.
